DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: item b, lines 2-3, "state" and "stage" should be changed to --phase-- respectively. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
3. Claims 12-24 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 12-24 are rejected as containing new matter because claim 12 contains the limitation of "heating the membrane to a temperature at least about 5°C above its said operating temperature" and claim 24 the limitations of "the treatment temperature is at least 5°C above the glass transition temperature of the membrane" and "the operating temperature is at least 5°C below the glass transition temperature of the membrane". These limitations have no support in the original presentation of the parent application 09/206,849, and thus, they are considered new matter.

Art Unit: 1741

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 12-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 is indefinite because the claim recites the heating temperature of the membrane as being at least about 5°C above the operating temperature, whereas the operating temperature is above 100°C. It is unclear to the examiner because the claim recites a variable (treatment temperature) based on another variable (operating temperature). Specific definitions of these temperatures are required.

Claim 12 is further indefinite because the claim recites the limitation "the elevated temperature". There is insufficient antecedent basis for this limitation in the claim.

Claim 16 recites the limitation "the percentage of crystalline phase". There is insufficient antecedent basis for this limitation in the claim.

Claim 17 recites the limitation "the intended operating temperature". There is insufficient antecedent basis for this limitation in the claim.

Claim 24 recites the limitation "the treatment temperature". There is insufficient antecedent basis for this limitation in the claim.
